

Leased Line Solutions

DESCRIPTION

64Kbps to 115Mbps Leased Line

What is a leased line?

A leased line is a fast permanent connection to the Internet from your office or network, giving you access to the Internet instantly. Leased lines come in different sizes dependant upon your needs with bandwidth from 64Kbps to 115Mbps.

How will it benefit you?

By choosing a leased line for Internet access, you actually become a part of the Internet itself. As a member of RIPE (Reseaux IP Europeens), Legend can, on your behalf, apply for and issue you with your own range of IP addresses. Fixed annual or monthly charges mean that no longer do you need to worry about Internet call charges, which allows you to budget more accurately. Email is delivered to your desktop instantly, orders from your e-commerce site will be delivered to you the moment they are placed, and downloads can be made in a split second. You can even develop your own Virtual Private Network (VPN).

Why Legend?

Legend offer you a fully managed service and unlimited technical support. Your leased line will be monitored 24 hours a day 365 days of the year and you will be guaranteed 99.9% uptime. Legend's experienced sales team will always be available to give you the right advice for the right solution at the best price.

How much support will you receive?

Legend provide full consultation and advice on security issues and products to protect your network. A pre-configured router will be provided to connect your LAN to the Internet. If you need help, our highly trained support team will be at hand to help you resolve any problems quickly and efficiently.

So if you think you need a leased line or would like more information - call Legend
